

PLANT ANALYSIS

Tissue Sampling Guide

SOYBEANS & OTHER LEGUMES

6 inches to flowering

Submit recently mature trifoliate leaves prior to or during flowering.

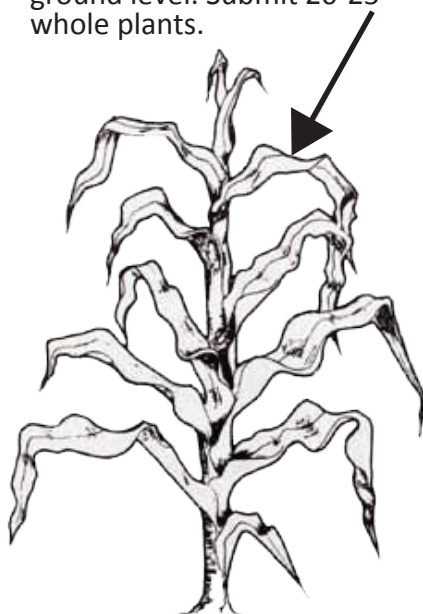

Sample 25 - 30 plants.

CORN

4 to 20 inches tall

Cut stalk off about 1/2" above ground level. Submit 20-25 whole plants.

Over 20 inches but prior to tasseling

Submit first fully developed leaf from top (first leaf below whorl). Cut leaf at its base where it joins sheath. Sample at least 20-25 plants.

Tasseling to pollination

Submit leaf below and opposite ear. Cut leaf at its base where it joins sheath. Sample at least 20 - 25 plants.
